

RECYCLED DENIM JEANS

BY Sara Louise®

- JOIN THE SUSTAINABLE FASHION REVOLUTION

Containing one-third recycled materials, Recycled Denim Jeans by Sara Louise® are certified by Repreve® – offering you a guaranteed sustainable textile solution.

34 % RECYCLED MATERIAL

Recycled Denim Jeans by Sara Louise® contain 34 % recycled PET (polyethylene terephthalate), which is a plastic product of the polyester family. The PET comes from plastic waste sourced from various industries and converted into reusable fibres. The final result is a delicate, high-quality thread that is one of the most environmentally friendly textile options on the market today.

WASH:

W716 Wash

DESIGN:

Available in two designs, with and without back pockets. The fit is equal to our bestselling trousers which have an elastic waistband all the way around except for 13 cm as well as a flat front.

PACKAGING:

All orders are packed and shipped from Bastex in boxes made from recycled materials.

CERTIFIED BY REPREVE®

Recycled Denim Jeans by Sara Louise® have been tested and certified by Repreve® – the clothing industry's seal of approval for sustainability, traceability and responsible textile production of fibres containing at least 30 % fibres from recycled material. Learn more at www.repreve.com.

A JOINT RESPONSIBILITY

When we as retailers, distributors, brands and manufacturers stand together to make a change in the world, we have immense potential to make a real impact on the environment. Because when more people start to purchase clothing made from recycled materials, fewer resources are needed for new textile production. On our own, we are only a drop – but together we can create a wave.
